2. Detailed Findings

### 2.1 Critical Issues

No critical issues found.

2.2 High Issues

ID	Description	Steps to Reproduce	Impact	Recommendation
1	User can´t return to game after access Game Rules on Iphone 13.	1- Open and start game 2- Click on icon on the bottom. 3- Click on display game rules icon. 4- Roll page.	Iphone users can´t leave Game Rules screen.	The "return" icon on Game Rules screen should be showed to Iphone 13 users like as other devices. Viewport 390 x 664 px.

2.3 Medium Issues

ID	Description	Steps to Reproduce	Impact	Recommendation
1	Sound not work on Iphone.	1- Open and start game 2- Click on icon on the bottom. 3- Then click on sound icon, and try to change sound status.	Sound not work on Iphone. The absence of sounds may decrease user´s experience.	Correct this issue, if an icon sound is showed, it should be functional.

2.4 Low Issues

ID	Description	Steps to Reproduce	Impact	Recommendation
1	Full Screen Mode cut a part from display on Edge and Chrome.	1- Open and start game; 2- Click on gift package icon 3- Start game 4- Look at the bottom.	The icon "Display game rules", clock, and other informations are not displayed properly.	This issue not occurs on Firefox, then Chrome and Edge should be have the same behavior.

ID	Description	Steps to Reproduce	Impact	Recommendation
2	If user is on "pay table" screen and access bet setting screen and choice any value, automatically return to game screen.	1- Start game 2- Click on left down icon. 3- Click on "i" icon. 4- Click on bet settings icon.	This behavior may decrease user experience, because pay table screen shows the pay values from symbols and these values are relative to bet setting. Then is interesting to user easily access the pay values when change the bet setting.	Suggestion: When user is on pay table screen, not goes immediately to game screen after change bet settings, and refresh automatically the pay values showed.

3	On/off sound icon may not work properly if user load two tabs with game.	1- On desired browser open game. 2- Then, open a second tab on browser and load game in this tab too. 3- Return to first tab and click on sound icon to mute sound. 4- Go to second tab and click on sound icon to mute sound. 5- Return to first tab.	Sound will be played with toggle sound is OFF.	Correct this wrong behavior. If toggle is off, sound should not be played. A failure feature may decrease user´s confidence on game.

3. Test Environment

Hardware Configuration:

PC Desktop – CPU Ryzen 5 5600; RAM 16GB GPU RTX 2060

Mobile – Iphone 13

Software Configuration:

- Operating System: Desktop Windows 11, Mobile IOS 18.2.1
- Browsers: PC (Edge, Chrome, Firefox), Mobile (Safari, Chrome)
